CP6244

COPYPRINTER

Can one digital duplicator give you outstanding image quality, exceptional reliability and low cost of operation? When it's the Gestetner CP6244 CopyPrinter, the answer's a resounding yes. For non-profits and businesses that want superior print quality at a manageable cost, plus the option of inexpensive spot color, the CP6244 sets a new standard for excellence and utility.

Quality and clarity: excellence in imaging. It's hard to believe a digital duplicator can produce such a high-quality image, but the CP6244 does just that. Placing high-density ink on the paper with unsurpassed control and precision, the CP6244 produces clear, crisp images. Gray scales are clean and clear, giving you sharp, consistent halftones and solid images. New pressure sensors have been added to the print roller to improve image quality. They sense the three factors that affect print quality — speed, temperature and humidity — and adjust the roller's pressure automatically.

Cooking with color. Brighten up your documents with spot color headlines and graphics. With the CP6244 CopyPrinter, you've got a full palette of standard, fast-drying inks. You can even order custom colored inks. To change colors, simply switch drums. It's easy and takes just a few seconds.

You're in control. The CP6244 CopyPrinter puts you in charge of image quality, giving you user-selected image tuning adjustment for letter, photo, letter/photo auto separation and tint printing. Image density is also user-adjustable to print light, normal, dark and darker.

Get more from your masters. Controlling printing costs is what most organizations look for in a digital duplicator. And the Gestetner CP6244 CopyPrinter delivers. Savings begin with the unit's long-lasting masters, which deliver 4,000 prints each, about twice what you'd expect from a conventional digital duplicator. The CP6244's excellent ink control system, which contributes to the CopyPrinter's image quality, also manages ink delivery to reduce consumption, which means more prints per ink cartridge.

No more misfeeds. Misfed sheets — especially of the inexpensive stocks non-profits often favor — can slow you down. That's why the CP6244 CopyPrinter comes equipped with a tested and proven retry feed mechanism. The feeder is unaffected by even thin, thick and irregular sized papers. From bond and NCR paper to construction stock, it handles sheets up to 11" x 17" and envelopes up to 10" x 13" with efficiency and ease.

Getting connected. Top-quality output and time and labor savings will be yours when you print direct from a Windows PC, Macintosh or network operating system*. Make the connection with the optional UC6 (external) controller interface, UC5e (embedded), or UC5 (external) and Type 40 (embedded) GDI controllers.

Specifications:

Configuration	Desktop book copying
Master processing	Fully integrated digital duplicator
Speed	60–120 prints/minute (5 Levels: 60, 75, 90, 105 and 120 ppm)
Master process time	24 seconds
Reproduction ratios	4 reductions: 93%, 77%, 74% and 65% 3 enlargements: 121%, 129% and 155%
Zoom	50% to 200% (1% increments)
Image density	4 levels: light, normal, dark and darker
Image tuning	4 modes: Letter, photo, letter/photo auto separation and tint
Original size	Max: 11.8" x 17" (Platen) Min: 5.8" x 8.3", Max: 11.7" x 17" (ADF)
Maximum image area	11.4" x 16.2"
Print paper sizes	Max: 12.8" x 17.6" Min: 2.8" x 5.9"
Print paper weights	12.5 lb. bond to 110 lb. index
Paper feed table capacity	1,000 sheets
Paper delivery tray capacity	1,000 sheets
Optional ADF original capacity	50 sheets
Power source	110/120V, 60Hz
Dimensions (WxDxH)	53.5" x 27.5" x 40.7" (including cabinet)
Weight	187 lbs.
Master run length	4,000 impressions
Master disposal capacity	More than 65

Special Features:

Auto background correction, Auto original size detection (with DF), Combine two originals, Energy saving mode, Master counter, Paper counter, Program Mode 9 jobs, Security Mode, Skip feed, Tape marker separation (optional), User codes up to 100

Options:

Color Drum
ADF (50 sheet capacity)
Tape Separator
Cabinet
Controllers: Type 40 (embedded), UC5 (external), UC5e (embedded), UC6 (external)

* All listed Print Controller models will support current Microsoft operating systems (as well as Macintosh OS X) that are publicly available at the time of this printing.
